Report on Faculty Development Program on "Collaborative Research for Sustainable Development" held on 22nd -31st Jan'2024

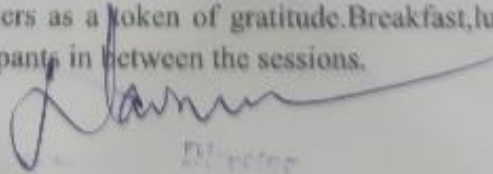

One week Faculty Development Program (FDP) on Collaborative Research for Sustainable Development was conducted from 22nd to 31st January at SGTBIMIT campus. The objective of the program was to enhance the research capabilities of faculty members and promote collaborative efforts toward achieving sustainable development goals.

The Faculty Development Program was organized by the Institute to foster a culture of collaborative research among faculty members. The program focused on imparting skills, knowledge, and strategies to enhance research collaboration for addressing contemporary challenges related to sustainable development.

The Keynote speakers of the FDP were Ms. Bimaldeep Kaur, Assistant Professor, SGCC(Delhi University), Mr. Rishab, Chartered Accountant and Mr. Prem Ranjan and his Associate from ICICI Prudentials. The FDP was structured with a mix of lectures, workshops, and case studies. Renowned experts in the fields of sustainable development, research methodologies, and collaboration strategies were invited to share their insights. The program also included group activities, case studies, and panel discussions to encourage active participation and engagement. Renowned researchers and scholars conducted sessions on advanced research methodologies, sustainable development goals, and collaborative research strategies. The program facilitated networking among faculty members from diverse disciplines, fostering potential collaborations for future research projects. Panels consisting of experts from different fields discussed the importance of interdisciplinary research in addressing sustainable development challenges. Faculty members gained a deeper understanding of sustainable development goals and the role of research in contributing to their achievement. Ongoing support for collaborative research initiatives, including funding and infrastructure, should be provided to sustain the momentum generated by the FDP.

The Faculty Development Program on Collaborative Research for Sustainable Development proved to be a valuable initiative in promoting a collaborative research culture among faculty members. The outcomes indicate a positive impact on the research capabilities of participants and the potential for meaningful contributions towards sustainable development goals through collaborative efforts.

In this FDP more than 50 entries are received from different institutes of Delhi-NCR. Kits and participation certificates were distributed to the participants. Kits and mementos were also presented to all the resource persons and keynote speakers as a token of gratitude. Breakfast, lunch and tea were arranged for all resource persons and participants in between the sessions.
