## LMS

At Sri Guru Tegh Bahadur Institute of Management and Information Technology (Sgtbimit), we prioritize the use of advanced educational technology platforms to provide high-quality learning experiences for our students. To achieve this, we have integrated two leading Learning Management Systems (LMS) — **Moodle** and **Google Classroom** — for managing our online courses, assessments, and communication between faculty and students.

### LMS Platforms in Use:

#### 1. Moodle:

- We utilize **Moodle** as a robust platform for delivering courses across various programs. Moodle allows for the creation of interactive course materials, including quizzes, assignments, and real-time feedback, enhancing the overall learning experience.
- **Number of Courses:** Currently, **BBA, BCA, and BBA (Banking & Insurance)** programs are hosted on Moodle. These courses cover a range of subjects, from management principles and business communication to computer applications and banking regulations.

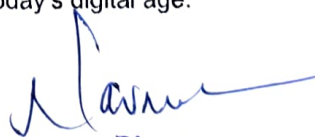

#### 2. Google Classroom:

- **Google Classroom** complements our Moodle usage by providing an intuitive, cloud-based system that facilitates communication and collaboration. It enables students to easily submit assignments, engage in discussions, and receive timely feedback from instructors.
- **Number of Courses:** We offer all the courses for the **BBA, BCA, and BBA (B&I)** programs through Google Classroom. These courses are designed to encourage interactive learning, with a focus on real-time collaboration and projects.

### Course Delivery Approach:

- At Sgtbimit, we ensure that our courses are delivered through a variety of formats that extend beyond traditional **YouTube videos** and **PowerPoint presentations (PPTs)**. Our content includes multimedia resources, interactive quizzes, discussion forums, and peer-reviewed assignments, all hosted on Moodle and Google Classroom. This approach fosters a more engaging and dynamic learning environment for our students.

By utilizing Moodle and Google Classroom, Sgtbimit continues to provide comprehensive and flexible learning options for students in the **BBA, BCA, and BBA (Banking & Insurance)** programs, ensuring they receive the best educational experience in today's digital age.
